

Commitment

Avondale Construction Limited (ACL) is committed to procuring sustainable ethical and responsibly sourced materials services and goods, which means, Avondale construction considers the economic social and environmental impact that purchasing may have on regionally globally locally on people and their communities.

ACL considers what produces are made from, where they come from, who has contributed to the making of the products, how they are decommissioned or manufactured into other products.

ACL commitment to all levels of sustainable procurement practices within the company is as follows:

- Purchase only legal and sustainable timber products with a valid FSC cert (COC)
- Where possible to purchase local materials, products and services and support SME business markets
- Reduce the purchase of new products by re-cycling or repairing existing products
- Procure durable goods and services which reflect up to date specifications or standards for environmental sustainability
- Prohibit the use of products or process, which are potentially damaging to the environment, such as toxic materials or refrigerants with high global warming potential where a less environmentally damaging alternative is available

This policy statement will be communicated to all employees working for or on behalf of Avondale Construction Ltd and any other stake holder.

This policy works in conjunction with ACL Corporate Social Responsibility & Social Value policy
